

# Mohamed Asik Sapteen

## Java Developer

Newark, NJ | (201)-884-0282 | [ashik.s@itechsavy.me](mailto:ashik.s@itechsavy.me) |  
<https://awzzmashiq.github.io/my-portfolio/>

### SUMMARY

- 4+ years of experience Java backend developer with expertise in SDLC, Agile, and Waterfall methodologies.
- Proficient in Core Java, Java, and SQL languages, with in-depth knowledge of frameworks like Spring MVC, Spring Boot, Spring Cloud, Spring Security, Hibernate, JSF, and Microservices.
- Strong command of J2EE technologies, including Servlets, JSP, JSTL, JavaBeans, and JDBC.
- Comprehensive understanding of databases, including MySQL, PostgreSQL, and MongoDB.
- Proficient in building tools such as Maven and Gradle, with experience in continuous integration using Jenkins and thorough unit testing with JUnit.
- Well-versed in cloud platforms like AWS and Azure, containerization with Docker, and orchestration using Kubernetes.
- Version control proficiency with Git and GitHub.

### SKILLS

**Methodology:** SDLC, Agile, Waterfall

**Languages:** Core Java, Java, SQL

**Frameworks:** Spring MVC, Spring Boot, Spring Cloud, Spring Security, Microservices, Hibernate, JSF

**IDEs:** Eclipse, IntelliJ IDEA, NetBeans

**J2EE Technologies:** Servlets, JSP, JSTL, JavaBeans, JDBC

**Web Technologies:** HTML, CSS, JavaScript, Bootstrap, JSON, XML

**Application Server:** Apache Tomcat, WildFly

**Databases:** MySQL, PostgreSQL, MongoDB

**Build /Other Tools:** MS Visio, Maven, Gradle, Jenkins, Junit

**Cloud Platforms & containers:** AWS, Azure, Docker, Kubernetes

**Version Control Tools:** Git, GitHub

**Operating Systems:** Windows, Linux/Unix

### EXPERIENCE

**Unum, TX | July 2023 - Current**

**Java Developer**

- Integrate backend logic with front-end technologies (HTML, CSS, JavaScript, Bootstrap) to create seamless user experiences.
- Leverage JSF for Java-based web application development and Improve a responsive and user-friendly interface.
- Building and deploying microservices using Spring Boot or similar frameworks.
- Leveraged JUnit to perform rigorous testing of complex codebase, resulting in a 70% reduction in time spent on debugging and issue resolution.
- Setting up, maintaining, and automating CI/CD pipelines using tools such as Jenkins.
- Utilizing Maven and Gradle for efficient project management and dependency resolution.

**Infoway Solutions, India | Oct 2021 - Aug 2022**

**Java Developer**

- Lead the end-to-end development of Java-based backend applications, Simplified high performance, scalability, and reliability.
- Employed Java and Spring Boot to develop an efficient Microservices architecture for Telecom Product enlarged capacity by 1000+ simultaneous users, lessened downtime by 50%, and improved service response time by 60%.
- Implement service discovery, load balancing, and fault tolerance strategies in microservices environments.
- Design and maintain databases (MySQL, PostgreSQL, MongoDB), ensuring optimal performance, data integrity, and security.
- Spearheaded development of cloud-native application using Kubernetes reduced application deployment time by 75% and infrastructure costs by 40%, saving over \$500k annually.

**ByteCraft System, India | Jan 2019 - Sep 2021**

**Java Developer**

- Utilize frameworks such as Spring MVC, Spring Boot, and Hibernate to design and implement robust solutions.
- Knowledge in Eclipse, IntelliJ IDEA, and NetBeans for effective development and debugging, enhancing productivity and code quality.
- Optimized the MYSQL performance for better user experience and boosted query efficiency which narrowed the response time from 1 second to 0.08 seconds.
- Designing and implementing RESTful APIs following best practices for scalability and maintainability.
- Manage version control using Git and GitHub, facilitating collaborative development with version history and branching.
- Engineered a comprehensive reporting system that consolidated data from 10+ sources and provided daily, weekly and monthly reports to increase team efficiency by 35%

### EDUCATION

**Masters of Science in Information Systems** | New Jersey Institute of Technology - Newark, NJ

**GPA – 3.7/ 4.00**

**Bachelors in Computer Science and Engineering** | Government College of Technology - Coimbatore, Tamil Nadu
